

# HLZ Post Processor

## Description

The HLZ post processor is an add-on software tool designed to format and split counting files before sending them to clearing.

## Benefits

- Easy control and revision of the actual countings.
- More customers as current clearer can be kept.
- Conversion of counting data to fit internal IT-systems.
- Only clearing of foreign beverage containers.
- Data privacy.

## Features

- More than one clearer.
- More than one outbox.
- Splitting of counting files into own and foreign beverage containers.

## Requirements

If the HLZ post processor is defined to use more than one clearer, the customers must be unambiguously identified from the batch label.
